Capabilities Statement

Overview

Long® Fence was founded in Washington D.C. in 1945 by Henry Long. In over sixty years of continuous operation, it has grown into one of the largest fence contracting companies in the United States. Long® Fence has earned and maintained a strong reputation for performing its scope of work in full compliance with specifications and project requirements. The Company's five offices are fully staffed to manage the design and construction of security fencing and related products nationwide professionally, within budgets and on time.

Security Solutions

Long® Fence has been a major provider of security solutions for thousands of commercial, industrial, institutional and government projects for over sixty years. We are a proven key partner to a wide range of clients whose common goal is to achieve a controlled site and restricted access to safeguard their private and public assets. Force protection for our military and safeguarding of our infrastructure, industrial complexes, chemical plants, institutional facilities, schools, public buildings, depots, airports, prisons, municipal, state and federal institutions, bridges, ports, treatment plants, highways, rail transportation lines, and innumerable associated sites require differing applications and solutions. Our common goal is to resolve the critical task of monitoring those who are authorized access and to deter those whose entry must be restricted. Aesthetic considerations, effectiveness and budgets are a significant part of the user's decision process that Long® Fence can facilitate through generations of experience and a vast variety of products and services. Business owners, developers and general contractors can rely on the design expertise, project management and construction teams of Long® Fence to develop and execute perimeter security projects on time and within budget.
