

LONG® BARRICADES

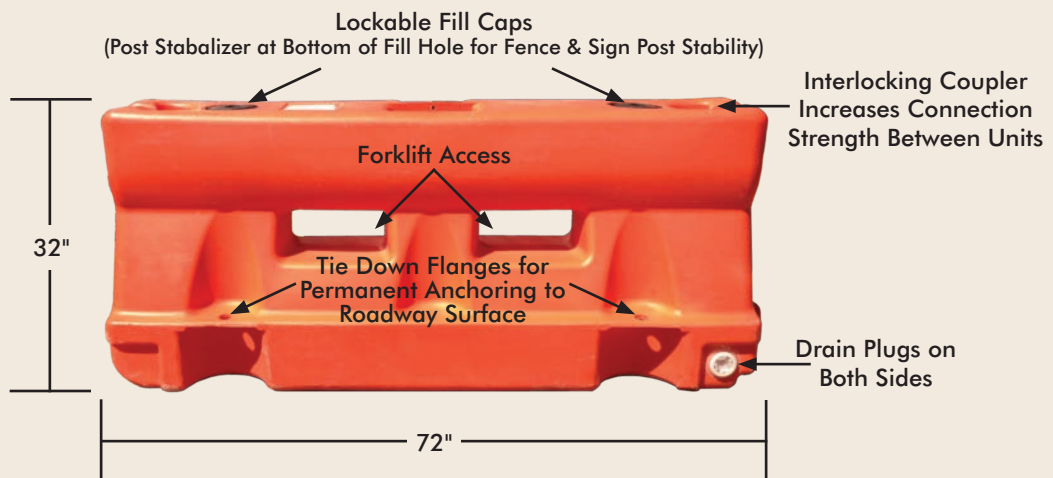

TEMPORARY WATER BARRIERS

Providing Safe & Secure Environments for
Highway & General Construction • Traffic & Crowd Control
Airports • Military & Government • Homeland Security • Special Events

Long® Water Barriers are a highly visible, safer alternative to concrete barriers. OSHA approved colors clearly delineate work zones, even at night and in bad weather. Made of high-density polyurethane, they won't rust, chip, bend or peel. Their lightweight construction allows for labor saving transportation and set-up. When ballasted, they are cost effective in long-term projects. Their size increases a passing vehicle's "shy" distance, keeping them from being hit, and their weight and inter-locking ability prevents theft and the need for daily repositioning. Chain link fence can be added when needed.

Long® Water Barriers are suited for commercial and residential environments, highway work zones & road blocks, education & healthcare sites, parking garage facilities, sports & recreation sites, military & government, airport construction & maintenance, or any other environment where controlled vehicular and pedestrian traffic is paramount for safety. Long® Fence rental service includes delivery, set-up and removal.

LONG[®] BARRICADES

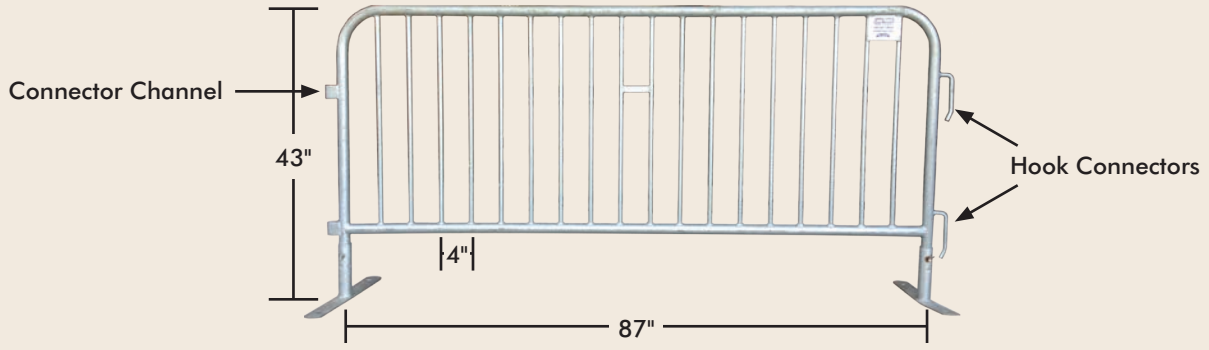

Providing Safe & Secure Environments for
Public Events • Grand Openings • Organized Demonstrations • Parades
Celebrations • Races • Exhibitions • Conventions • Festivals • Concerts

Maintains
Restricted Access • Crowd Control • Pedestrian Safety • Security

Long[®] Barricades are free-standing, galvanized steel panels for temporary use in situations involving pedestrian safety and control, crowd maintenance, restricted access and security.

Long[®] Barricades are perfect for public events, celebrations, grand openings, festivals, concerts, parades, organized demonstrations, races or any other type of outdoor assembly where a controlled environment is paramount for pedestrian safety.

We offer service to federal, state and local government agencies, including the National Park Service, plus property managers, event planners, party and tent rental companies or any organization that requires temporary modifications to public access. Our rental service includes delivery, set-up and removal.
